

# Manage Asset Groups

## Introduction

The Manage asset groups page is where you create and manage all your different groups or teams. You can create as many groups or teams as you require, there aren't any restrictions.

## Page Breakdown

The screenshot shows the 'Manage Asset Groups' interface. On the left is a sidebar with four menu items: 'Automated Discovery', 'Add & Delete Assets', 'Edit Assets', and 'Manage Asset Groups' (highlighted in red). The main area features a tab labeled 'Asset Groups (3)' with a '+' icon. Below the tab is a table with columns: Name, IP Address, Asset Valuation, Site/Location, Team, Asset Details, and Tags. The table contains a group named 'Network' which is expanded to show three assets: 'Router 1', 'SDWAN router', and 'Switch 1'. There are also expandable sections for 'Unix' and 'Windows'.

Name	IP Address	Asset Valuation	Site/Location	Team	Asset Details	Tags
Network						
Router 1	192.168.100.1	\$100,001 to \$200,000	All Sites		Cisco Router	cisco, router
SDWAN router	192.168.100.10	\$100,001 to \$200,000	All Sites			router
Switch 1	192.168.100.2	\$0 to \$100,000	All Sites			cisco, switch
▸ Unix						
▸ Windows						

1. Add Group – This allows you to add/create new groups.
2. Asset Group – This shows the number of existing groups and represents the tab containing all groups.
3. Name – This shows what are the groups that have been created beforehand. You can expand on the group name, which will show what are the assets under the group.

## Summary

The Manage Asset Groups page provides tools to create and manage asset groups. This page should have served to answer all questions related to the managing asset group page but if you feel anything has been missed or just seek further clarification, please reach out to us at [support@simplerisk.com](mailto:support@simplerisk.com).
